The following phrases describe skills or behaviors that your child might exhibit during social interaction or social situations.

Please rate HOW OFTEN your child exhibits each skill or behavior independently, without assistance from others (i.e. without reminders, cueing and/or prompting). You should base your judgment on your child's behavior over the last 3 months.

Please use the following guidelines to rate your child's behavior:

Circle **N** if your child never or almost never exhibits the skill or behavior

Circle **S** if your child sometimes or occasionally exhibits the skill or behavior

Circle **O** if your child often or typically exhibits the skill or behavior

Circle **V** if your child very often or always exhibits the skill or behavior

Please do not skip any items. If you are unsure of an item, please provide your best estimate. You may use the "Brief Description" section to provide additional information on the particular skill or behavior. For instance, if your child will exhibit a particular skill or behavior more frequently when cueing or prompting is provided, or when interacting with adults rather than peers, please make note of this.

	Skill Area	How Often	Brief Description
1	Invites peer to join him/her in activities	N S O V	
2	Joins in activities with peers	N S O V	
3	Takes turns during games and activities	N S O V
